

## Data Delivery

Remote temperature data delivered in real time  
 With accuracy and expertise. Save money and time:  
 Keep an eye on your data and instrumentation without  
 Going into the field; make the most of it when you do.

### Specifications

|                      |  |
|----------------------|--|
| Real-time Monitoring | <ul style="list-style-type: none"> <li>• 24-7 protected access to your project data, from a single dashboard</li> </ul>  |
| Access               | <ul style="list-style-type: none"> <li>• Monitor from anywhere (including your mobile device) using an internet connection</li> </ul>  |
| Download             | <ul style="list-style-type: none"> <li>• Download data anytime with one click</li> <li>• Comma delimited (.csv) file opens automatically with Microsoft Excel or other spreadsheet and database applications</li> </ul>  |
| Multiple Sites       | <ul style="list-style-type: none"> <li>• View and navigate data from multiple sites from one easy to use dashboard</li> <li>• Compare data from all sites with one click</li> </ul>  |
| Visualize            | <ul style="list-style-type: none"> <li>• State of the art visualization tools</li> <li>• Accurate representation of complex datasets</li> <li>• Adjustable for different time scales</li> <li>• View options: Time series graph and profile graph</li> <li>• Option to animate profile graph</li> <li>• Additional view of data in table display</li> <li>• Site locations plotted in Google Maps for easy reference and comparison</li> </ul> |
| Backup               | <ul style="list-style-type: none"> <li>• Meet security requirements: automatic daily weekly and monthly archiving ensures backup of your data in the cloud</li> </ul>  |
| Share                | <ul style="list-style-type: none"> <li>• Share data easily with others, using “add user” function</li> <li>• Control user access with individual accounts</li> </ul>   |
| 2-Way Communication  | <ul style="list-style-type: none"> <li>• Communicate remotely with data loggers through web interface</li> <li>• Increase or decrease logging and transmitting intervals</li> <li>• Initiate special messages from the web to trigger site specific self-configuration</li> <li>• Reset data loggers remotely</li> </ul>   |
